

OBJECTIVE	Seeking full time opportunities in areas of optimization, forecasting, data analytics, with applications in revenue management and control of production/logistics/supply chain systems.	
SUMMARY	<ul style="list-style-type: none"> <li>- Ph.D. candidate in Operations Research in Dept. of ISE at Virginia Tech; Expected to graduate in Fall 2018.</li> <li>- Solid knowledge in IE/OR, data science; Proficient in multiple math modeling languages.</li> <li>- Hands-on project experience in building optimization/simulation-based decision support tools.</li> <li>- Energetic self starter, outstanding analytical ability and strong communication skills.</li> </ul>	
EDUCATION	<b>Ph.D. in Operations Research</b> , Virginia Tech, Blacksburg, VA <span style="float: right;">FALL 2018 (EXPECTED)</span> <b>M.S. in Industrial and Systems Engineering</b> , Virginia Tech, Blacksburg, VA <span style="float: right;">2016</span> - GPA: 3.92/4; Advisor: <a href="#">Dr. Subhash C. Sarin</a> .  <b>B.S. in Industrial Engineering</b> , Tongji University, Shanghai, China <span style="float: right;">2013</span> - GPA: 4.64/5; Rank: 2/55; Thesis: <i>Scheduling of parallel machines with group maintenance considerations</i> .	
GRADUATE COURSEWORK	<b>Operations Research:</b> Linear/Nonlinear/Integer/Dynamic Programming, Scheduling and Sequencing Theory, Random Processes, Simulation. <b>Manufacturing Systems:</b> Manufacturing Systems Engineering, Production Planning & Control, Lean Manufacturing, Semiconductor Manufacturing. <b>Statistics and Mathematics:</b> Probability Theory, Statistical Inference, Statistical Learning, Real Analysis.	
COMPUTER SKILLS	<b>Programming Languages:</b> C++, C#, Python, VBA. <b>Optimization:</b> CPLEX/OPL, AMPL. <b>Scientific Computing:</b> R, Mathematica.	<b>Database:</b> SQL, Access. <b>Simulation:</b> AutoMod, ProModel, Simio. <b>Others:</b> AutoCAD, $\LaTeX$ .
RELATED EXPERIENCES	<b>An Iterative Two-Stage Approach for a Location-Inventory-Routing Problem</b> <span style="float: right;">2017</span> (Winner of IISE 2017 student case competition in Logistics and Supply Chain) <ul style="list-style-type: none"> <li>- Proposed an iterative two-stage approach for the strategic network design and the operational decisions.</li> <li>- Refined the original IP formulation, which resulted in a more compact and tighter model. Computational test revealed a reduction of the solution time by <math>10^3+</math> times.</li> <li>- Coded a computer decision support tool based on our proposed approach (C++ with CPLEX).</li> <li>- Visualized our solution by the multidimensional scaling technique.</li> </ul> <b>Mid-Atlantic Biomass Sorghum Feedstock Delivery Logistics Design</b> (funded by USDA) <span style="float: right;">2016 – PRESENT</span> <ul style="list-style-type: none"> <li>- Proposed various sorghum feedstock logistics systems under different logistics structure, decentralization level, and ensiling (storage) method.</li> <li>- Building models for these logistics systems.</li> </ul> <b>Advanced Biomass Feedstock Supply Chain Design</b> (funded by DOE) <span style="float: right;">2015 – 2016</span> <ul style="list-style-type: none"> <li>- Formulated a fleet management model in the design of a switchgrass-based bio-ethanol supply chain.</li> <li>- Proposed the Dantzig-Wolfe decomposition framework solving a combination of two or three optimization problems in location allocation, lot sizing, and equipment routing encountered in biomass feedstock logistics.</li> </ul> <b>Simulation Analysis of an Automated Material Handling System in a Semiconductor Fab</b> <span style="float: right;">FALL 2014</span> <ul style="list-style-type: none"> <li>- Built a simulation model (AutoMod) of the AMHS. Proposed a coding framework for simulating complex AMHS, enabling flexible adjustment of process sequences of wafers.</li> <li>- Implemented and analyzed different scenarios (such as releasing and dispatching rules) for the best scenario based on cycle time and throughput. Analyzed the potential bottleneck of the AMHS.</li> </ul>	

PUBLICATIONS	<b>Fangzhou Sun</b> , Subhash C. Sarin, and Yuqiang Wang. <i>Integrated production and shipping scheduling for a single manufacturer and multiple customers</i> . Submitted to Omega.	
	<b>Fangzhou Sun</b> and Subhash C. Sarin. <i>A Joint Production and Delivery Schedule for a Single-Vendor-Single-Buyer System over Finite Horizon</i> . In preparation, target: European Journal of Operational Research.	
	<b>Fangzhou Sun</b> , Rahul Ramachandran, Maichel M. Aguayo, and Subhash C. Sarin. <i>A taxonomic review of biomass feedstock supply chain problems</i> . In preparation, target: International Journal of Production Research.	
PRESENTATIONS	- <i>Introduction to AutoMod and AutoSched AP</i> . Workshop, Virginia Tech.	SEP 2016
	- <i>Integrated production and shipping scheduling for a single manufacturer and multiple customers</i> . INFORMS Annual Meeting, Philadelphia, PA.	NOV 2015
OTHER	<b>Graduate Teaching Assistant</b> , <i>Virginia Tech</i> , Blacksburg, VA	2014 – 2016
EXPERIENCES	- Courses: Industrial Automation, Industrial Cost Control, Manufacturing Process Lab, Data Management, Semiconductor Manufacturing.	
	<b>Logistics Intern</b> , <i>Shanghai Volkswagen Automotive</i> , Shanghai, China	SUMMER 2012
	- Inquired suppliers the delivery costs of purchased parts, and updated the information in database.	
	- Communicated with suppliers to implement a new Just-In-Time system, to reduce the outbound logistics cost and lead time.	
	<b>Vice President</b> , INFORMS VT Student Chapter	2015 – 2016
	- Average attendance per each seminar were 11, a 30% growth than the previous academic year.	
	- Won INFORMS 2016 Student Chapter Annual Award, Magna Cum Laude.	
SELECTED AWARDS	Winner, IISE/ISERC 2017 student case competition in Logistics and Supply Chain.	2017
	Graduate Student Assembly Travel Fund, <i>Virginia Tech</i> .	2015
	Outstanding Graduate, Honors Student, <i>Tongji University</i> .	2011 – 2013
	Provincial 1st Prize of Chinese Physics Olympiad, <i>Chinese Physics Society</i> .	2009
